

Dear author

I am reaching out to researchers in the **field of failure analysis and failure mechanisms of materials** with an invitation to submit scientific papers to our journal.

Engineering Failure Analysis is the leading journal on this topic (2022 CiteScore of 6.1 and 2021 Impact Factor of 3.634), publishing around 900 papers/year with at least 1 million readers per year. The journal has an average review time of 13 weeks and an acceptance rate of 32%. **Engineering Failure Analysis** publishes:

- Comprehensive critical reviews on failure mechanisms or failure analysis.
- In-depth research papers investigating failure mechanisms.
- Failure analysis of engineering components, structures or systems based on materials characterisation methods and numerical simulations.

You can find additional information about the **journal metrics** in this [LINK 1](#) and the **guide for authors** in this [LINK 2](#).

I hope you will consider publishing in **Engineering Failure Analysis**, and I look forward to receiving your submission in the near future.

With kind regards,

Prof Cesar R F Azevedo
