Conference goals

The international scientific conference is intended for doctoral students and young scientists (up to 35 years of age) of universities and scientific workplaces focused on the field of construction and management of machines and manufacturing equipment in agricultural, forestry and food production, on the marketing of machines and technical systems.

The conference program will enable the participants to become familiar with the scientific research activities of universities and other institutions at the international level and will provide space for mutual exchange of information and experience in the areas of focus of the conference.

Conference areas

- development trends in hydraulic elements, systems and fluids used in agricultural, forestry and manufacturing technology,
- automation, robotics, and informatics,
- energy and environment,
- quality and reliability of machines and equipment,
- technology and mechanization of agriculture and forestry,

- technology of production processes,
- properties and processing of agricultural and forestry materials and products,
- management of production processes and security of technical systems.
